ABSTRACT

The project is to build a website that allows players to stay updated about sports meet events. Lack of information flow, systematic arrangement and time control have led to the high faulty conduct of the sporting events organised yearly based by student on the behalf of college. So, in order to address following issues this website will be successful in solving problems generated at early years sporting events. This website will let colleagues know all the details of sports events. This website will provide facilities to access team members, fixtures, venues of various sporting events. Website will have a section where the result of the various sporting event conducted on the particular day will be mentioned.

Chapter 1

INTRODUCTION

1.1 BACKGROUND

Till the present context, we have been facing lots of problems during sports meets due to bad management of organizers. So, in the regards of those problems we are planning to make a website for the sport meets. We provide information regarding sports meet within this website so that there will be no delay or mismanagement during sports meet events. Whether sharing information regarding sports meet event, or sharing captured memories during the event, or providing the user the service to access the team and fixture to manage their respective team, GCES Sports will make the sports meet events run smoothly.

1.2 PROBLEM STATEMENT

There are many problems we have been observing and facing during GCES Sports meet events like being unable to start the game in given time, lack of team members during the game play, and so on. Due to these, it will take much more time for the organizers to finish their events which directly affects the other curriculum activities of the college. In order to minimize the above problems “GCES Sports” is developed.

1.3 OBJECTIVES

GCES Sports is a website that provides a platform for sharing information regarding sports meet events. This project fulfils the following goals: -

- To inform the participants and others about the schedule regarding sports meet events.
- To provide a platform where people can share their captured memories of sports meet events.

1.4 IMPLICATION

This website can be used by group of people who are participating in the GCES Sports meet events. Also, this website will provide a service to the login user to manage teams. So, this site solves the ultimate sporting circumstances prevailed in GCES. Either providing information or memories about sports meet events or providing service to manage their teams, GCES Sports website can be implemented.

Chapter 2

LITERATURE REVIEW

Numerous websites have already been developed in the market which provides a platform for smooth management of sports event. Apart from these established websites our goal is to provide a more user-friendly website which makes the jobs done smoothly.

(BBC, 2020) operates a subsite of BBC outline which supplements the television and radio services of the department. The website features sports and analysis from a variety of sports. The site also includes news, stories related to teams or particular sports and live broadcast coverage of same sports.

(Reynolds, 2020) was founded by sports media executives with more than 40 years of combined experience working with print and digital content platforms with the most influential medias companies in the industry. Their mission: bring engaging, quick-hitting and well-written sports news and analysis direct to sports fans on the device they consume content on.

Chapter 3

TOOLS AND METHODOLOGY

3.1 REQUIRED TOOLS

The following tools was used for the development of the website:

- Programming languages to be used
 - HTML
 - CSS
- Scripting languages to be used
 - JavaScript
 - PHP
- Database
 - MySQL
- For making diagrams
 - Photoshop
- For making Gantt chart
 - MS Excel
- For making wireframe
 - Adobe XD

3.2 METHODOLOGY

3.2.1 USE CASE DIAGRAM

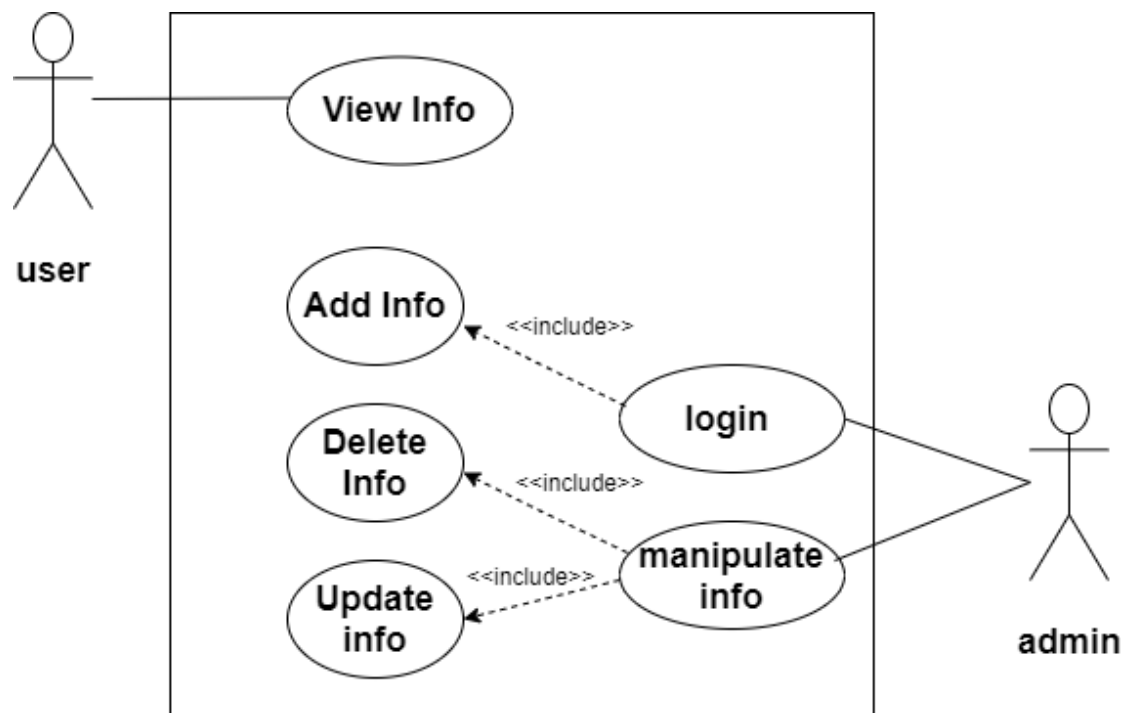

Figure 3.2.1: Use Case Diagram (UCD) of GCES Sports

Use Case UC1: View Info

Primary Actor: User

Precondition:

Postcondition: User can see the update of the games, fixtures & results which are added by admin.

Alternate flow: If the user is unable to open the website then he/she must reopen the website.

Use Case UC2: Manipulate Info

Primary Actor: Administrator

Precondition: Admin must login

Postcondition: Admin can add, delete and update information. Admin can also use image, videos and texts for manipulation.

3.2.2 SYSTEM SEQUENCE DIAGRAM

3.2.3 ENTITY RELATIONSHIP DIAGRAM

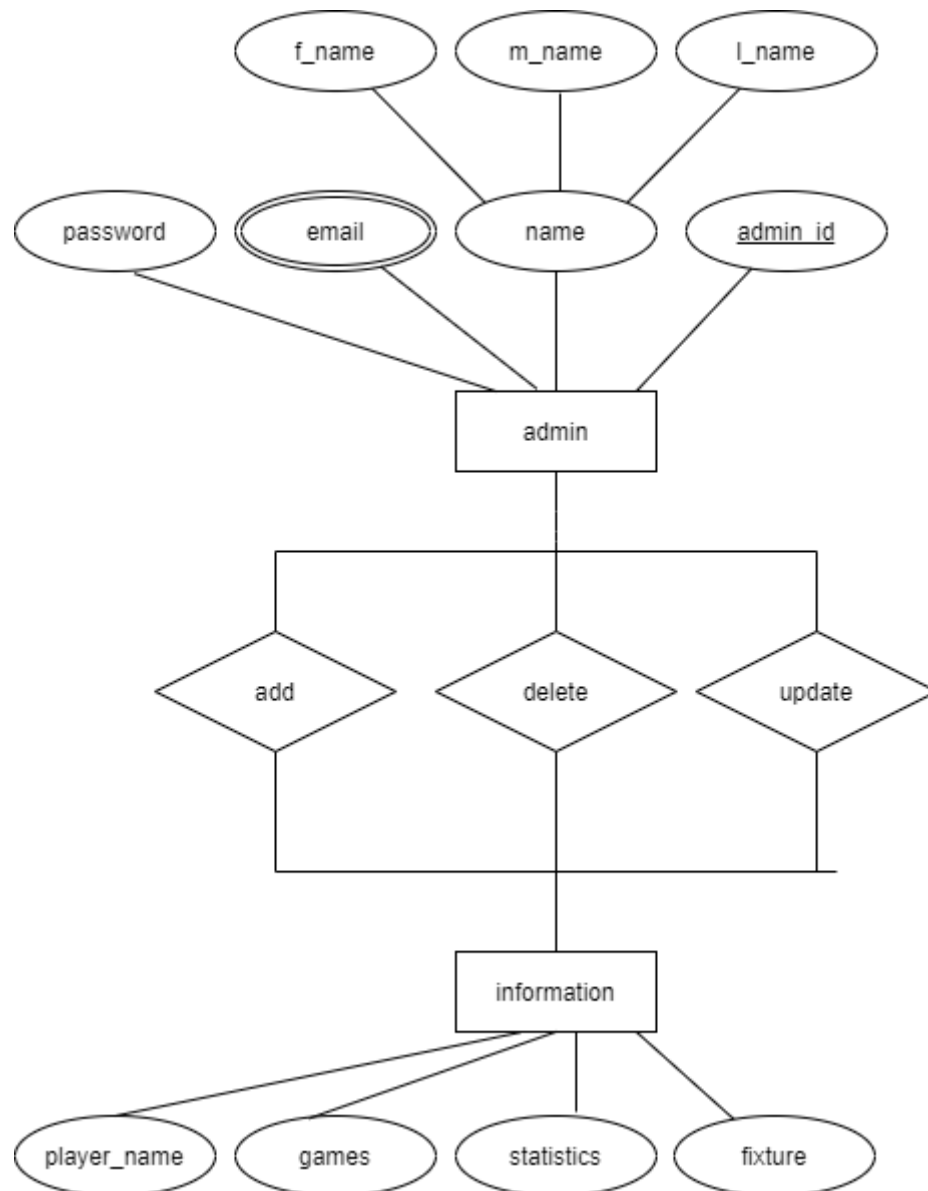

Figure 3.2.3: Entity Relationship Diagram (ERD) of GCES Sports

Chapter 4

TEST CASE

4.1 SOFTWARE TESTING

Software testing is a process, to evaluate the functionality of a software application with an intent to find whether the developed software met the specified requirements or not. It also identifies the defects to ensure that the product is defect-free in order to produce a quality product.

4.2 TEST OBJECTIVES

The main objectives of testing GCES Sports were to:

- Check whether the web application is as per the requirements or not.
- Ensure defects get a fix from the developers before deployment.
- Gain confidence in the level of quality of the system.

4.3 TEST RESULTS

S.N.	TEST CASES	EXPECTED	OBSERVED	RESULT
1.	Authentication for admin	A specific email with its respective password should be used	Only specific emails with its respective correct password are logged in	Ok
2.	Surf Site	<ul style="list-style-type: none"> - Stay updated about game fixture, result, news and players stats - View the photos of the sports meet - Necessary feedback can be submitted 	<ul style="list-style-type: none"> - Game fixture, result, news and players stats were checked - Pictures was successfully viewed and downloaded - Feedback was successfully submitted by user and received by admin 	Ok
3.	Add data	- All details about the sport meet	- The request is sent only when all	Ok

		<p>events should be provided</p> <p>- When the estimated timeframe of the game crossover, the result to be published goes for the pending section</p>	<p>details are provided</p> <p>- Pending matches will be updated by admin in the admin panel</p>	
4.	Search necessary details	<p>- Specific team search by selecting the name of team in the search bar</p>	<p>- Available team members and their info are shown when searched via the search bar</p>	Ok

Table 4.1: Test Case

Chapter 5

RESULTS AND DISCUSSIONS

Our project GCES Sports helped us to learn in detail about the development of web application. It provided us the opportunity to get expertise in various web development languages. Our product can be used in the real-world for GCES sports meet. This project was completed within the estimated time and with the coordination of team members.

5.1 LIMITATIONS

This website was designed in focus of sport events in GCES and its arising issue to conduct events efficiently. But there are some limitations. They are listed below:

- Internet access is required.
- Technical persons needed to manage the system.
- Digital devices are required for accessing the website and developing quality content.

5.2 FUTURE IMPROVEMENTS

Some of the improvements that can be implemented in the future are as follows:

- Optimization of the system.
- Addition of new features and functionalities.

Chapter 6

CONCLUSION

GCES Sports is a website for organizing sports meet event efficiently in GCES. This website provides a platform for GCES users to achieve the benefit of having their own professional website for sports meet. Users as a admin can manage data of sports meet. Users as a guest can view fixtures, results, news, pictures and players stats. Overall, GCES sports is a website that provides a platform for sharing information regarding sports meet events.
